During 7th century Bce several walls built by Qin Shi Huang, who was the first emperor of china. The Great wall stretches from Dandong in the east to Lop Lake in the west. It controlled borders, imposed duties of goods, encouraged trade and controlled immigration and emigration. Further more, it ~~protect~~ ~~chinese~~ ~~states~~ and ~~empires~~

Q. No 4

Q. 11. Write a letter to the Superintendent of Police about the nuisance of loud speakers.

Ans.

Moh. Aakash Nagar,

Bhopal,

13<sup>th</sup> February, 20.....

To,

The Superintendent of Police,

Bhopal.

Subject : Nuisance of loudspeakers.

Dear Sir,

I beg to bring to your kind notice the annoyance and inconvenience caused to several people, mainly students in this locality by the unrestricted way in which loudspeakers are allowed to be used both during night and day by some people.

For instance, only yesterday we had to tolerate loudspeakers all the twenty four hours of the day in our locality. Although my house is one kilometre away from the place where the loudspeaker was being actually played yet I could not sleep whole night. I really wonder how people residing nearby were able to put up with the noise. And, how students could have been able to study.

I, therefore, suggest, there should be a restriction of hours as well as volume at which the loudspeakers can be played, so that should not become a source of irritation to others.

Hope my suggestions would be come to you.

Thanking you.

Yours faithfully,

Kamlesh Sharma.

Q. 12. A large number of people are seen migrating to cities in search of jobs and better opportunities, causing a burden on the basic infrastructure such as transport, This trend needs to be checked. Write a letter to the Editor of                      ways and means to solve it.

## 5. Wonders of Science

05

(M.P. 2022)

Or

### Science, a Blessing or a Curse

#### Science : A good servant but a bad master

Or

#### Science : A Boon or a Curse

"In the sky above, in the ocean below and on the earth in between—everywhere has gone the triumphant chariot of science." —Anon

"Our life, today, is governed and conditioned by the offshoots of science." —Nehru

**1. Introduction :** In the dim dawn of creation when man opened his eyes he saw the blazing sun, the shining moon, the twinkling stars, the fast flowing rivers etc. he cried in the amazement, "What are these ?"

That question has been fully answered, today, by science.

The modern age is the age of science. The effect of science can be seen in all aspects of life. There are many wonderful things invented by science. In fact it has brought about a complete change in the whole world. We can say that science has changed this world into a fairyland.

**2. Science as a Blessing :** We can discuss science as a blessing as below:

**(i) Science in our Daily Life :** Science has increased comforts in the life of mankind.

Daily life has now become very easy with the help of science. Food can be cooked very quickly by pressure cooker and can be kept fresh for a long time in refrigerator. Clothes can be washed in a washing machine without any labour in a very short time.

**(ii) Electricity :** Electricity is a great wonder of science. Science has given us fans and air-conditioners which save us from heat and cold. Electric bulbs and tubelights give us light. Machinery works with the help of electricity.

**(iii) Means of Transportation and Communication :** Science has made our travels more comfortably now. We have various means of journey. They take us to our destination in a short time comfortably. We have won distance by the use of trains, buses, cars, steamers and planes. In fact, the far off countries have come closer due to quick services of aeroplanes. We can travel thousands of miles in a few hours.

Science has brought a revolutionary change in the field of communications also. Telephone, telegraph and wireless have made the world quite small. Radio and television are the valuable gifts of science.

**(iv) Medical Field :** Science has helped us to fight many fatal diseases like T.B. and Cancer. It has lessened the sufferings and miseries of mankind. Surgery and X-rays are great boons. Science has given eyes to the blind, legs to the lame and ears to the deaf. Diseases like plague, cholera, small pox and malaria have been controlled by the help of science.

**(v) Agriculture :** Better with the help of fertilizers, medicines and better irrigation facilities we can take bumper crops. 'Green Revolution' and 'White Revolution' (milk) have given us a lot.

**(vi) Entertainment and Education :** Science has given us cinema, T.V., radio and many other things. It has given us calculators, robots, cameras and computers. Computer is a great wonder of science. These inventions help in the field of education.

**3. As a Curse :** But this is only one side of the coin. Science has produced many deadlier weapons also and made wars most destructive by bombs and missiles. The world is sitting on a volcano. Any Laden or Hitler may explode it. If the Third World War breaks, it will destroy the whole world by nuclear weapons.

It has been rightly said, "The third world war will be fought with bombs and missiles but the fourth will be fought with stones and arrows."

— C.E.M. Joad

**4. Conclusion :** Gandhiji has rightly said, "Science has taught us to fly like birds in the sky and swim like fish in the oceans but it has not taught us how to walk on the earth."

In fact, there is nothing wrong with science. It is up to man, how he uses it. It is a blessing and a curse both. Hence, many should use science for peace and happiness of mankind. It should never be used for war or any other destructive purpose. We can say that science is a good servant but a bad master.
